Book Review:

Rare and Uncommon Diseases

The book contains topics on Rare & Uncommon Diseases like Autistic disorder, Asperger's syndrome, Carpal tunnel syndrome, Huntington disease, Systemic lupus erythematosus, Psychosis, Rabies, Migraine, Psoriasis, and many more. Each disease has been explained by their symptoms, diagnosis, causes and treatment. At the start, there is a summary of the whole chapter, so that one can easily take the concept within the limited time. Keywords are also included for quick indicator of the chapter. Introductory material for Pharmacy, medical, & dental students, also M Phil, PhD for Pharmacology, Botany, Zoology, Microbiology, Pharmacy, Biotechnology and all other related health sciences subjects. It is also very helpful for Common people. The book is editd by Dr. Muhammad Imran Qadir who is working as Assistant Professor at Institute of Molecular Biology & Biotechnology, Bahuddin Zakariya University, Multan, Pakistan. Dr. Qadir has published more than 200 articles in reputed national and international journals, an author of 15 books and supervised 40 M Phil/PhD theses. Dr. Qadir has developed a new cost-effective and convenient method for diagnosis of cancer named as "Qadir test". Dr. Qadir has also invented two anti-HIV drugs (Qadirvirtide & Qadir C30) that may be used as prophylaxis or for the treatment of AIDS. He has established use of many local plants for cancer, jaundice/hepatitis, hypertension, asthma, diabetes, spasm, ulcer, fever, diarrhea, and infectious diseases of bacterial and fungal origin. In recognition of his research performance, Higher Education Commission of Pakistan has awarded him "Best Young Research Scholar".
